

Copenhagen Economic's Annual Postal & Delivery conference

Annemarie Gardshol
CEO PostNord Group
May 11, 2021

Our Sustainability Goals

**Promote fair
transport**

**Vision Zero for
Fair conditions for all**

**Unleash the
power of
diversity**

**Gender equality
An inclusive workplace**

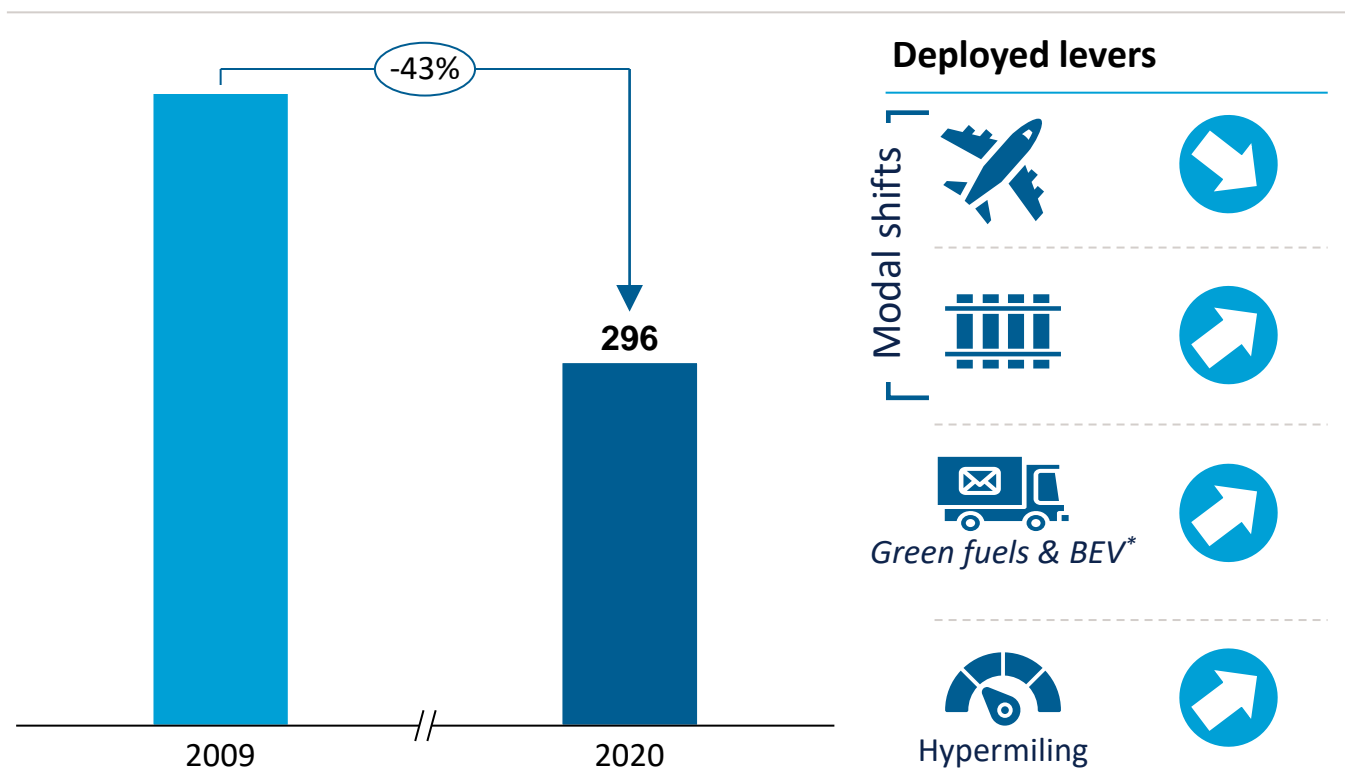

**Manifest
climate
leadership**

Towards Fossil Free 2030

PostNord – since long highly dedicated to reducing climate impact and we continue our ambitious green journey

CO₂ reduction progress and key levers (CO₂ Emissions '000 t)

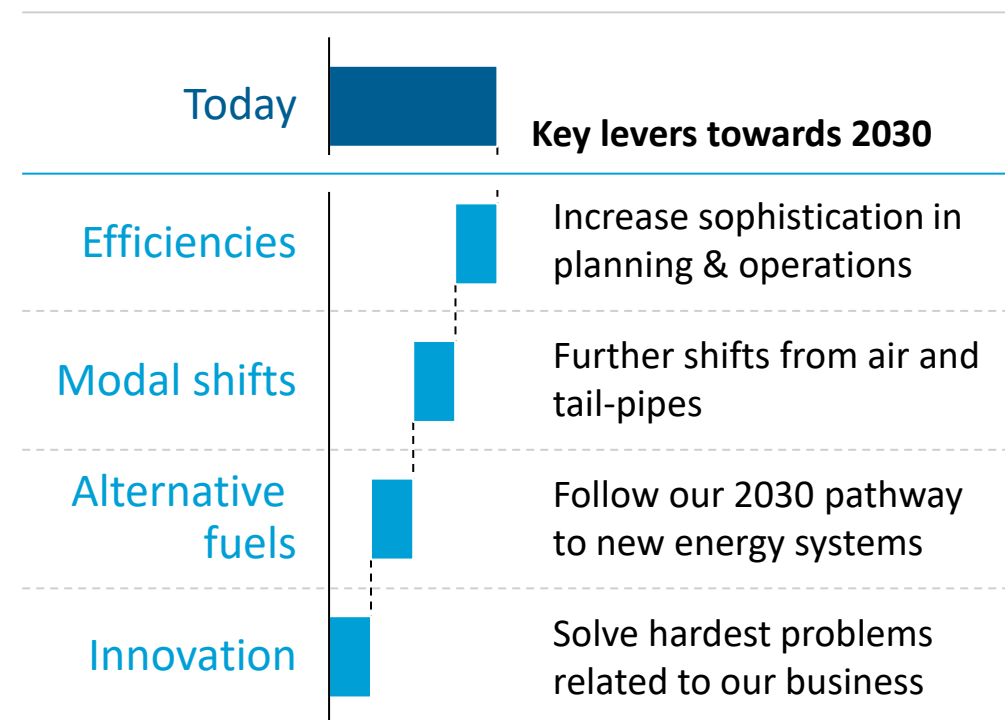

Last year we reached our goal of reducing CO₂ by 40%

*BEV – Battery Electric Vehicles

We now aim to be fossil-free by 2030

Committed to reducing air in e-commerce parcels

Challenges holding back the industry's development towards less air in e-commerce parcels:

- Unfeasible to investment in packaging technology
- Too high costs for storing multiple sized boxes
- Faster and more efficient to use larger boxes
- Practical challenges, e.g. Large-scale shipping labels that do not allow a small package are common
- Fear of jeopardizing a positive consumer experience

Conclusion: the industry needs to find business models that promote optimized packaging

Cooperation with a joint goal to reduce climate impact by 2030

- Telia wants to increase the return rate of obsolete hardware
- Custom-made return packaging are provided
- The adapted packaging reduces the need for transport capacity
- Efficient logistics a prerequisite for our joint success
