In the Logistics Performance Indicator in the Kingdom

We Adopt Future Technologies.

We study the infrastructure requirements and the legislative aspects necessary for the modern modes of transportation, including electric vehicles and autonomous vehicles, in the Kingdom. Our aim is to be the pioneers in applying them after their feasibility for the system has been proven.

Hyperloop

Autonomous Ships

Autonomous Cars

We Develop Today's Services...

We supervise transportation activities, the safety of their facilities operation and equipment, their proper management, their provision at a good level and appropriate cost, and the regulation of investment in such activities in accordance with the Kingdom's objectives of economic and social development.

Mechanism of Truck Entry to Major Cities

In partnership with the General Directorate of Traffic and the Saudi Ports Authority, and in coordination with the concerned authorities, the first phase of this mechanism was launched in Jeddah. It allows trucks to book electronic appointments to enter the city so as to contribute to regulating the flow of trucks, preventing their accumulation at city entrances, and raising the level of quality and efficiency of transport.
